

Vehicle cameras

# vision-uno & vision-duo

The vision is a dashcam and tracking device that integrates with Kinesis and Kinesis Pro. It features 4G connectivity, 256 GB of storage for 48 hours of high-quality video, and is easy to install in cars, vans, and HGVs.

The front camera has the ability to record key driving events like speeding and harsh braking, helping analyse driver behaviour and providing collision evidence. A panic button lets drivers mark important events instantly. The vision-duo combines video recording and tracking in a single, efficient solution.

## Driver facing camera

The vision-duo camera monitors driver behaviour in realtime, promoting safety, compliance, and improved driving standards.

## Live streaming

Provides real-time video footage from in-vehicle cameras, enabling instant visibility for enhanced safety and incident response.

## Includes tracking capabilities

Access features such as Live Map, Trip History, and Driver Performance for real-time tracking, journey insights, and driver behaviour monitoring.

## HD camera quality

The HD camera system captures clear and detailed footage with a 1080p front-facing camera for enhanced visibility and a 720p driver-facing camera for effective incident review.

## What comes in the box:

- vision device
- Bullet camera
- Sticky pads x2
- Allen key
- Cabling

## Installation guides and support:

The vision vehicle camera device facilitates the following software features:

**Kinesis features:**

Live map

Trip history

Speeding

Alerts

Driver performance

Geofences

Standard reports

Vehicle performance

Videos

Live streaming

**Kinesis Pro additional features:**

Custom alerts

Custom driver behaviour

Custom reports

Alert-triggered video downloads

Customise video clip duration (1-60 seconds)

Device Health

**FAQs:**

**How does the vision track my vehicle's location?**

The vision uses GPS technology to provide real-time location tracking, ensuring accurate journey monitoring.

**What is the memory on the vision?**

The vision comes with 256GB of storage, allowing for extended recording time before overwriting begins.

**How do I access the video recordings and vehicle tracking information?**

You can access video recordings, vehicle location, and driver performance data through Kinesis and Kinesis Pro.

**Does the vision include CAN data and driver ID?**

No, the vision does not include CAN data or Driver ID.

**Does the vision dashcam record continuously?**

Yes, the vision records continuously while the vehicle is running, storing up to 48 hours of drive-time footage and deleting the oldest files when the SD card has reached capacity.

**Does the vision support live streaming?**

Yes, vision supports live streaming, providing real-time video footage for enhanced visibility and incident response.

**How is the vision installed?**

The vision is professionally installed, ensuring proper connection to the vehicle's power supply and optimal functionality.

**Is the vision camera night vision capable?**

Yes, the vision has enhanced low-light recording, ensuring clear footage in poor lighting or nighttime conditions.

**Does the vision have a forward-facing camera?**

Yes, the vision includes a forward-facing camera to capture road-facing footage.

**Does the vision record audio?**

Audio recording is switched off by default but can be enabled upon request.

**Does the vision support multiple camera types?**

No, the vision only supports a forward and driver facing camera.

**Technical specifications:**

Product	
Name	vision-uno/duo
Device category	Vehicle camera
Dimensions	4.72 in x 2.36 in x 1.18 in (without bracket) 4.72 in x 2.36 in x 3.34 in (with bracket)
Weight	250g
Operating temperature	-20°C ~ +70°C
Connection/power source	OBD/Hardwired 12v-24v
GPS location accuracy	< 3 m
Connectivity	4G
Resolution vision-uno	1920*1080P
Resolution vision-duo	1280*720p
Video format	MP4
Storage/memory	vision-uno: 256Gb vision-duo: 256Gb
