

Vehicle cameras

# vision-mercury

The vision-mercury is a forward facing 2-in-1 dash cam and vehicle tracker that integrates with Kinesis and Kinesis Pro. It features 4G connectivity, 128 GB of storage for 109 hours of high-quality video, and is easy to install in cars, vans, and HGVs.

The vision-mercury has the ability to record key driving events like speeding and harsh braking, helping analyse driver behaviour and providing collision evidence. A panic button allows drivers to instantly mark important events when needed.

For added visibility, there is also the option to include an in-cab camera, alongside the standard forward-facing camera, giving a complete view of both the road and driver activity. The vision-mercury combines video recording and tracking in a single, efficient solution.

## Forward-facing camera plus optional in-cab camera

The vision-mercury camera has an extension cable that supports an additional in-cab camera for flexibility.

## Live streaming

Provides real-time video footage directly from the vehicle camera, enabling instant visibility for enhanced safety and incident response.

## Includes tracking capabilities

Access features such as Live Map, Trip History, and Driver Performance for real-time tracking, journey insights, and driver behaviour monitoring.

## HD camera quality

The camera system captures clear and detailed footage with a HD forward facing camera for enhanced visibility and for effective incident review.

## What comes in the box:

- Dash cam unit
- Windshield bracket
- Power/ camera cable
- SIM card slot cover

## Installation guides and support:

## The vision-mercury vehicle camera facilitates the following software features:

### Kinesis features:

Live map

Trip history

Speeding

Alerts

Driver performance

Geofences

Standard reports

Vehicle performance

Videos

Live streaming

### Kinesis Pro additional features:

Custom alerts

Custom driver behaviour

Custom reports

Alert-triggered video downloads

Customise video clip duration (1-60 seconds)

Device health

## FAQs:

### How does the vision-mercury track my vehicle's location?

The vision-mercury uses GPS technology to provide real-time location tracking, ensuring accurate journey monitoring.

### What is the memory on the vision?

The vision-mercury comes with 128GB of storage, allowing for extended recording time before overwriting begins.

### How do I access the video recordings and vehicle tracking information?

You can access video recordings, vehicle location, and driver performance data through Kinesis and Kinesis Pro.

### Does the vision-mercury include CAN data and driver ID?

No, the vision-mercury does not include CAN data or Driver ID.

### Does the vision-mercury dash cam record continuously?

The vision-mercury records continuously while the vehicle is in operation, storing up to 109 hours of footage as standard. When the optional in-cab camera is added, storage capacity supports up to 54 hours of recorded footage.

### Does the vision-mercury support live streaming?

Yes, vision-mercury supports live streaming, providing real-time video footage for enhanced visibility and incident response.

### How is the vision-mercury installed?

The vision-mercury is professionally installed, ensuring proper connection to the vehicle's power supply and optimal functionality.

### Is the vision-mercury camera night vision capable?

Yes, the vision-mercury has enhanced low-light recording, ensuring clear footage in poor lighting or nighttime conditions.

### Does the vision-mercury have an in-cab camera?

Yes, an additional in-cab camera is available for the vision-mercury, but it is an optional extra rather than a standard feature.

### Does the vision-mercury record audio?

Audio recording is switched off by default but can be enabled upon request.

### Does the vision-mercury support additional cameras?

Yes, the vision-mercury supports one additional camera channel alongside the forward facing camera.

**Technical specifications:**

Product	
Name	vision-mercury
Device category	Vehicle camera
Dimensions	110mm (W) x 67.8mm (H) x 29.5mm (D). Height with wire 80.8mm.
Weight	194g
Operating temperature	-20°C to 70°C
Connection/power source	9-36V DC
Resolution	CH 1: 720p as standard CH 2 : 720p as standard
Connectivity	Built in 4G module: 1 SIM card slot (for nano SIM card). Built-in Wi-Fi module, 2.4GHz 802.1 b/g/n, AP mode /CPE mode.
Video Compression	H.265
Storage/memory	128GB
